## Jupiter is the Only Platform That Provides Consistency For Multigrade Classrooms and Teachers

### The Challenge

Education leaders at NNEC grappled to address the unique needs of their small-scale, multigrade classrooms. Leaders desired a platform that offered uncomplicated and immediate tech support with embedded options for accessible staff training. Leaders realized that classrooms would benefit from one streamlined platform that was easy to use and served as a central hub for the district's SIS, gradebook, and communications log. Providing teachers with an easy way to set up and monitor multigrade classrooms became NNEC's Education department's central concern.

### Choosing Jupiter

Given that NNEC's schools served multiple grade levels and content areas within small classroom settings, leaders had to select the optimal solution to fit their needs. The ability to set up multigrade classrooms in Jupiter, combined with a high level of customer service, provided NNEC with an inclusive platform that would benefit all stakeholders. From requiring access to a library of training resources to receiving help within fifteen minutes of requests, NNEC had a direct connection to Jupiter when they needed it and were pleased with the responsiveness of the tech support team.

### The Outcome

After adopting Jupiter across NNEC's campuses, teachers embraced the ability to quickly set up classrooms consisting of various grade levels and content areas. In addition, parents and students utilized Jupiter's features to track progress in the moment and monitor the timely completion of assignments. The robust program provided NNEC with the ideal solution they were looking for, enabling schools to train staff and provide immediate tech support as needed. Leaders continue to be amazed at how Jupiter acts as a central hub connecting all stakeholders, with teachers affirming the platform's ease in setting up and maintaining classroom attendance, assignments, and communications.

**Jupiter is the answer for our biggest challenge: multigrade classrooms!**

Sonia Edwards, Education Superintendent of Northern New England Conference

### The Client

Northern New England Conference of Seventh-Day Adventists (NNEC), headquartered in Westbrook, Maine, has an Education department consisting of 9 schools, spanning Pre-K to 12th grade, with a total student enrollment of 230 and 30 staff members.

### Challenge

At NNEC, providing consistent support for multigrade classrooms across several campuses was the main problem to solve. Leaders identified a need for a single platform to serve as the Student Information System (SIS), grade book, and parental communication portal. In addition, district leaders preferred a scalable, user-friendly, and all-encompassing program to serve as the district-wide Learning Platform..

### Solution

NNEC appreciates Jupiter's robust grading and communication features enabling teachers to track student progress while teaching several grade levels at once. Parents appreciate the ability to access student information quickly, finding the platform both intuitive and informative to use. In addition, Jupiter's training guides are so beneficial to use that teachers rely on them to onboard new staff members.
