FOR IMMEDIATE RELEASE

Finalists Announced for 2014 EdTech Digest Awards Program

Popular recognition program celebrates education technology tools, trendsetters and leaders.

DALLAS, TX – March 12, 2014 - The finalists for the fourth annual EdTech Digest Awards Recognition Program honoring tools, trendsetters and leaders in the education and technology sector have been announced. The Jupiter iO LMS solution, Juno, was announced as an award finalist in the category of, "Cool Tools; New Product or Service".

The distinguished awards program recognizes outstanding solutions—and the best and brightest minds—in education and technology. A distinguished panel of industry influencers and veterans conducted this year's evaluation proceedings.

"There is a lot of talent and quality out there, and we're excited to recognize these cool tools, leaders and trendsetters in the education technology space," said Victor Rivero.

The Cool Tool award recognizes new, emerging and established technology solutions for education, such as the Juno LMS feature within the Jupiter iO solution. Jupiter iO provides a cost effective, all-in-one LMS, grade book, SIS, and data analytics solution.

Juno provides teachers the tool to create online rubrics, tests, quizzes, exercises, worksheets, and tutorials.

Students can use computers, tablets, and/or smartphones to submit files utilizing the new dropbox feature, complete online assignments anywhere, anytime, participate in online peer reviews with the new Juno Docs and so much more.

"We are honored Juno LMS has received this recognition by the 2013 EdTech Digest Awards. As a former teacher and technology administrator I am very proud to be a part of an emerging technology solution and the innovative, forward thinking Jupiter Ed team," said Jackie Deluna, Executive Director of Marketing for Jupiter Ed.

Juno may be purchased separately by individual teachers or as a part of the all-in-one Jupiter iO solution for K-12 and college campuses. For more information about Juno and the all-in-one Jupiter iO solution, please visit <http://jupitered.com>.
